Heat shrinkable Seal Fiber Optic Splice Closure(FOSC)

Features

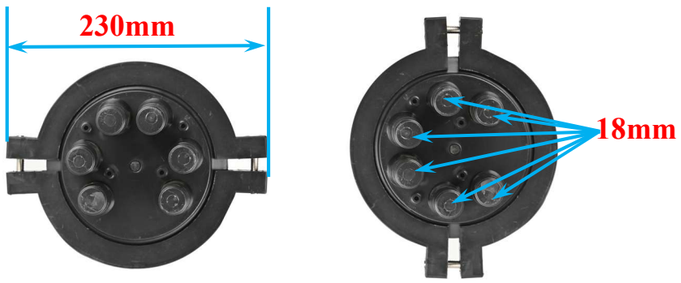

The closure adopts heat shrinkable sealing structure.
There is one big oval shaped inlet/outlet port in base.
The big oval shaped port is used for the sealing of uncut straight-through fiber cable, the small ports are used for branch fiber cable and drop cable.
It adopts engineering PP plastic with high-strength to make the closure has longer life time and excellent sealing performance.
The patented sealing structure keep good sealing performance after re-entry and re-using.
The bending radius of FOSTs meet the international standard. It could save the installation time and improve work efficiently.

Applications

Suitable for bunchy fibers
Aerial, underground, wall-mounting, hand hole-mounting, pole-mounting and duct-mounting
